

Peter Klopp
Advanced Animation
7 February 2020

End of Week:

- I. This week I accomplished:
Getting a pyramid and polygon class to work.
- II. This week I had problems with the following:
Getting things to render properly without affecting the way other objects appeared (ex: fillStyle on one object would affect the fillStyle for all objects).
- III. What I learned this week:
I learned how to use matter composites to make structures such as pyramids and stacks.
